

Project 5: Lead Class Discussion

OBJECTIVE	A critical element of an architectural education is your ability to cogently comprehend, digest and amalgamate a diverse set of information and be capable of disseminating that to others either graphically or verbally. As such a portion of this course will focus on this ability and will require you to lead a class discussion(s) based on a series of assigned readings.
METHOD	Each student group will be required to oversee and orchestrate that days conversation with the assistance of some slides. These presentations are not intended to be one-hour long lectures. Instead, as discussion leaders, you are expected to give a 10-15 minute long primer for the readings and then facilitate an approximately 45 - 60 minute discussion with the assistance of the instructor. These discussions are intended to be loose and as wide ranging as necessary.
EVALUATION	Evaluation will be made based on your ownership / presentation of the topic and ability to lead the conversation.
PRODUCT	The slide show that is used to facilitate the discussion shall be submitted through the course website as a PDF using the following naming convention: LastName.LastName.Class#.pdf
